jastin agaziva

Student at Daystar University|frontend developer|Web developer|
free-lancer| passionate about solving great world problems using the
current technology.

Nairobi County, Kenya

Summary

Solving the world's hardest problems in a simple way has always
been my passion. And that is the main reason that led me to dive
into the IT field, I'm passionate about learning new things and using
my skills to make the impossible happen. Teamwork has also been
a workout for me since by managing a team and working together
I'm able to deliver the best with much ease and within the expected
timeline. I'm looking forward to completing my studies and focusing
on improving the world through technology.
